sql

mongoDB

## PERSONAL PROJECTS

### Payout-dashboard (Next.js and MongoDB ) (05/2023 - Present)

- Designed and developed a payout dashboard for efficient tracking of completed payouts.
- Implemented a secure login system with JWT authorization exclusively for authorized company employees.
- Integrated MongoDB database to manage and store employee data for secure access.
- Automated the payout calculation process, reducing manual intervention and errors.
- This app allows users to choose a specific month and opportunity ID, enabling the generation and delivery of payout reports for all the investors of that opportunity.

### E-Commerce WEB APP – (Next.js and MongoDB)

- This is an application built with next.js as a front end and MongoDB as a Backend.
- This application gets all the product information from the database and displays it in the front end.
- You can add the product to the cart and checkout.

### APARTMENT MANAGEMENT SYSTEM. (Java )

- This application aims at maintenance and a list of payment to be done.
- Here only the admin can add and the user can only check the maintenance amount.
